It takes an enormous amount of time to keep on top of outfitting your staff by traditional methods. If you are currently making that effort, you will save substantially by letting Park Avenue shoulder the burden. The superior tracking methods of Park Avenue will virtually eliminate losses.

### **How Our System Works Smarter:**

Unlike other companies, we simply charge you for the hire of as many garments as you need. We take the responsibility for keeping those garments in circulation. Every garment we supply has a complete history record in our mainframe computer. Each time a garment is processed, its barcode and serial number is scanned into the computer and its record is updated.

By matching garments with wearers, we make each of your employees a customer of ours. When that employee leave just notify us and we will stop his or her supply and reduce your weekly rental.

Every employee we are supplying will be listed on the invoice.

### **Other Services:**

**Smart storage** – We can provide specially designed lockers that tidy up your change room and give shift workers 24-hour access.

**Reduces loss** – If a garment doesn't come through our laundry when expected, we'll let you when and where we last saw it, so it can be tracked down.

**Fast Tracking** – If you require quick turn around on the garments for a one off occasion or on a regular basis just call us and we can facilitate.

**Clear paperwork** - Our paperwork shows you at a glance what you are paying for: how many garments and whom they are for.

**Better service** - The highest level of service has kept Park Avenue ahead of our competitors for over 50 years. You'll be surprised how prompt, thorough and friendly our service is.

**Prompt repairs** – repairs requested by the wearer are ordered in our system and completed in the same laundry cycle. We also make regular quality inspections and repair any damage we find.

**Quality manufacture** – Park Avenue's rental garments are supplied by Australia's leading workwear manufacturers and comply with Australian Standards, the highest standards for durability and comfort.

**Extra feedback** – We will keep you as informed as you want to be about everything, right down to the way specific employees treat their clothes.

**Personal ID** – User labels link the garment to its wearer and help your employees identify their clothing.

**Quality Control** – Park Avenue is ISO9001- 2000 accredited and can provide evidence for you to demonstrate compliance with quality accreditation programmes and regulatory requirements.

**Corporate ID** – If you want to project your company image and have your employees present a professional image, we can customise clothing with logos, company and employees' names at minimal cost.

**Quick recovery** – Someone always manages to leave the car keys or mobile phone in the pocket of their overalls. We'll find that pocket and recover the valuables as soon as the alarm is raised.

**Extensive coverage** - Whether you are in Lakes Entrance or Laverton, Williamstown or Wantrina, our delivery vans pass your door. Park Avenue pick up and deliver daily all over Melbourne and eastern Victoria.
